Accessories and Services for Older Model VTRs

Many useful accessories for older quad VTR's are no longer available from the original manufacturers.

Merlin can now supply a wide range of these, and others are under development and will be available soon.

ME-198 A replacement power supply for VR1200 A or B. This is a precision regulated power supply of modern design which will usefully enhance the overall stability and the signal to noise performance of the VTR.

ME-208 A frame extension for VR2000's. This useful kit provides additional rack space on top of VR2000's which allow convenient and neat installation of additional accessories and monitoring. Available in several heights to suit your special needs.

ME-218M A VHO kit for Merlin ME-88's which allows quick and accurate optimization of record current.

ME-218/2000 A VHO for Ampex VR2000's.

ME-228 Cue channel kit. To fit into early single channel Ampex audio chassis to provide cue capability.

Merlin can supply a wide range of special refurbishing services. This includes refurbishing to better than original specifications, transports, capstan assemblies, tape idlers and tape timers. The scope of this work is steadily increasing. Call us and discuss your needs.
