

Merlin Quality Quad Refurbishing: Making the best better!

The first quadraplex videotape recorder went on the air in 1956. It is likely that most of the thousands of VTRs that followed are still operational . . . many of them performing better than when they were new. Thanks to Merlin.

At Merlin Engineering, a major portion of our engineering effort is dedicated to rebuilding and refitting quad VTRs . . . no matter what the vintage. Each machine receives individual attention according to customer requirements, but three basic services are available:

Standard Rebuilding Thorough overhaul and parts replacement to return the VTR to original operational condition.

ULTRAFURBISH Complete upgrading of the machine to state-of-the-art performance with the addition of a complete digital time base correction package.

Custom Engineering Development of system design and ancillary equipment to adapt the VTR to specific user requirements.

Customer machine may be refurbished, or in many cases, exchanged to eliminate down time.
